COUNTY OF FAYETTE, ILLINOIS

ORDINANCE NUMBER 2017-06-13-A

AN ORDINANCE APPROVING THE PREVAILING WAGE

ADOPTED BY THE FAYETTE COUNTY BOARD
OF THE COUNTY OF FAYETTE, ILLINOIS
THIS ___________ 13th ___________ DAY OF JUNE, 2017

PUBLISHED BY THE AUTHORITY OF
THE COUNTY BOARD OF FAYETTE COUNTY
THIS ___________ 13th ___________ DAY OF JUNE, 2017
work in the County of Fayette as determined by the Department of Labor of the State of Illinois as of June 2017, a copy of that determination being attached hereto as Exhibit A.

**SECTION 3.**

Nothing therein shall be construed to apply said prevailing rate of wages herein ascertained to any work or employment except public works of this County to the extent required by the aforesaid Act.

**SECTION 4.**

All contracts entered into by the County which provide that the contractor shall pay the prevailing minimum wage rates for the various classes of laborers and mechanics to be engaged in work on the project shall be subject to the provision of this Ordinance.

**SECTION 5.**

The County Clerk shall publicly post or keep available for inspection by any interested party in the main office of the County this determination of such prevailing wages.

**SECTION 6.**

The County Clerk shall mail a copy of this determination to any employer and to any association of employers and to any person or association of employees who have filed, or file their names and addresses, requesting copies of any determination stating the particular rates and the particular class of works whose wages will be affected by such rates.

**SECTION 7.**

The County of Fayette shall promptly file a certified copy of this Ordinance with both the Secretary of State Index Division and the Department of Labor of the State of Illinois.

**SECTION 8.**

The County Clerk shall cause a notice to be published in a newspaper of general circulation within the area that the determination of prevailing rate of wages has been made. Said notice shall conform substantially to the notice hereto attached. Such publication shall constitute notice that this is the determination of the County of Fayette and is effective.
This schedule contains the prevailing wage rates required to be paid for work performed on or after Monday, June 5, 2017 on public works projects in this County. Pursuant to 820 ILCS 130/4, public bodies in this County that have active public works projects are responsible for notifying all contractors and subcontractors working on those public works projects of the change (if any) to rates that were previously in effect. The failure of a public body to provide such notice does not relieve contractors or subcontractors of their obligations under the Prevailing Wage Act, including the duty to pay the relevant prevailing wage in effect at the time work subject to the Act is performed.

FAYETTE COUNTY

ELECTRICIANS (NORTH) - Townships of Bowling Green, Carson, Hurrican, Loudon, Ramsey, and South Hurricane.

GLAZIERS (SOUTHWEST) - That part of the county South and West of diagonal line running between the Bond, Montgomery, Fayette junction and North of Farina.

The following list is considered as those days for which holiday rates of wages for work performed apply: New Years Day, Memorial Day, Fourth of July, Labor Day, Thanksgiving Day, Christmas Day and Veterans Day in some classifications/counties. Generally, any of
these holidays which fall on a Sunday is celebrated on the following Monday. This then makes work performed on that Monday payable at the appropriate overtime rate for holiday pay. Common practice in a given local may alter certain days of celebration. If in doubt, please check with IDOL.

Oil and chip resealing (O&C) means the application of road oils and liquid asphalt to coat an existing road surface, followed by application of aggregate chips or gravel to coated surface, and subsequent rolling of material to seal the surface.

EXPLANATION OF CLASSES

ASBESTOS - GENERAL - removal of asbestos material/mold and hazardous materials from any place in a building, including mechanical systems where those mechanical systems are to be removed. This includes the removal of asbestos materials/mold and hazardous materials from ductwork or pipes in a building when the building is to be demolished at the time or at some close future date.

ASBESTOS - MECHANICAL - removal of asbestos material from mechanical
systems, such as pipes, ducts, and boilers, where the mechanical systems are to remain.

In addition, the grouting, cleaning, sealing, and mixing on the job site, and all other work as required in assisting the setter. The term "Ceramic" is used for naming the classification only and is in no way a limitation of the product handled. Ceramic takes into consideration most hard tiles.
